

YAP

YOUR **A**UTOMOTIVE **P**ARTNER

The management software for

Digitalising

**Car Service
Companies**

BUSINESS DIGITALISATION

**HARNESS THE POWER OF DIGITAL TOOLS
TO IMPROVE
YOUR COMPANY'S PERFORMANCE**

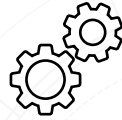

WHY CHOOSE

YAP

YOUR WORK IS NOT TIED TO A PC

DO EVERYTHING FROM ONE PLATFORM

Manage the entire vehicle - maintenance process with one system, from inspections to workshop and tyre services - along with all administrative and accounting activities.

YOUR DATA IS ALWAYS UP-TO-DATE AND READY TO USE

YAP is **integrated with the main technical databases**. It includes **preloaded tyre price lists** and a **shared vehicle database** is available to all YAP users. It's optimised to handle **large volumes of data** without any time lag during uploading. Your **database is shared across all your company locations**, so you can access it from anywhere - simultaneously if necessary - and work with information that's updated in real time. Your data is organised within an **advanced Business Intelligence** system that provides your **business's key statistics, supporting more effective and informed management** of your operations.

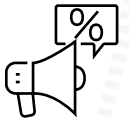

CHOOSE THE MODULES AND SERVICES THAT FIT YOUR NEEDS

Since the **software is modular**, our consultants can help you design your digitalisation project by finding **the best solution for your workflow**.

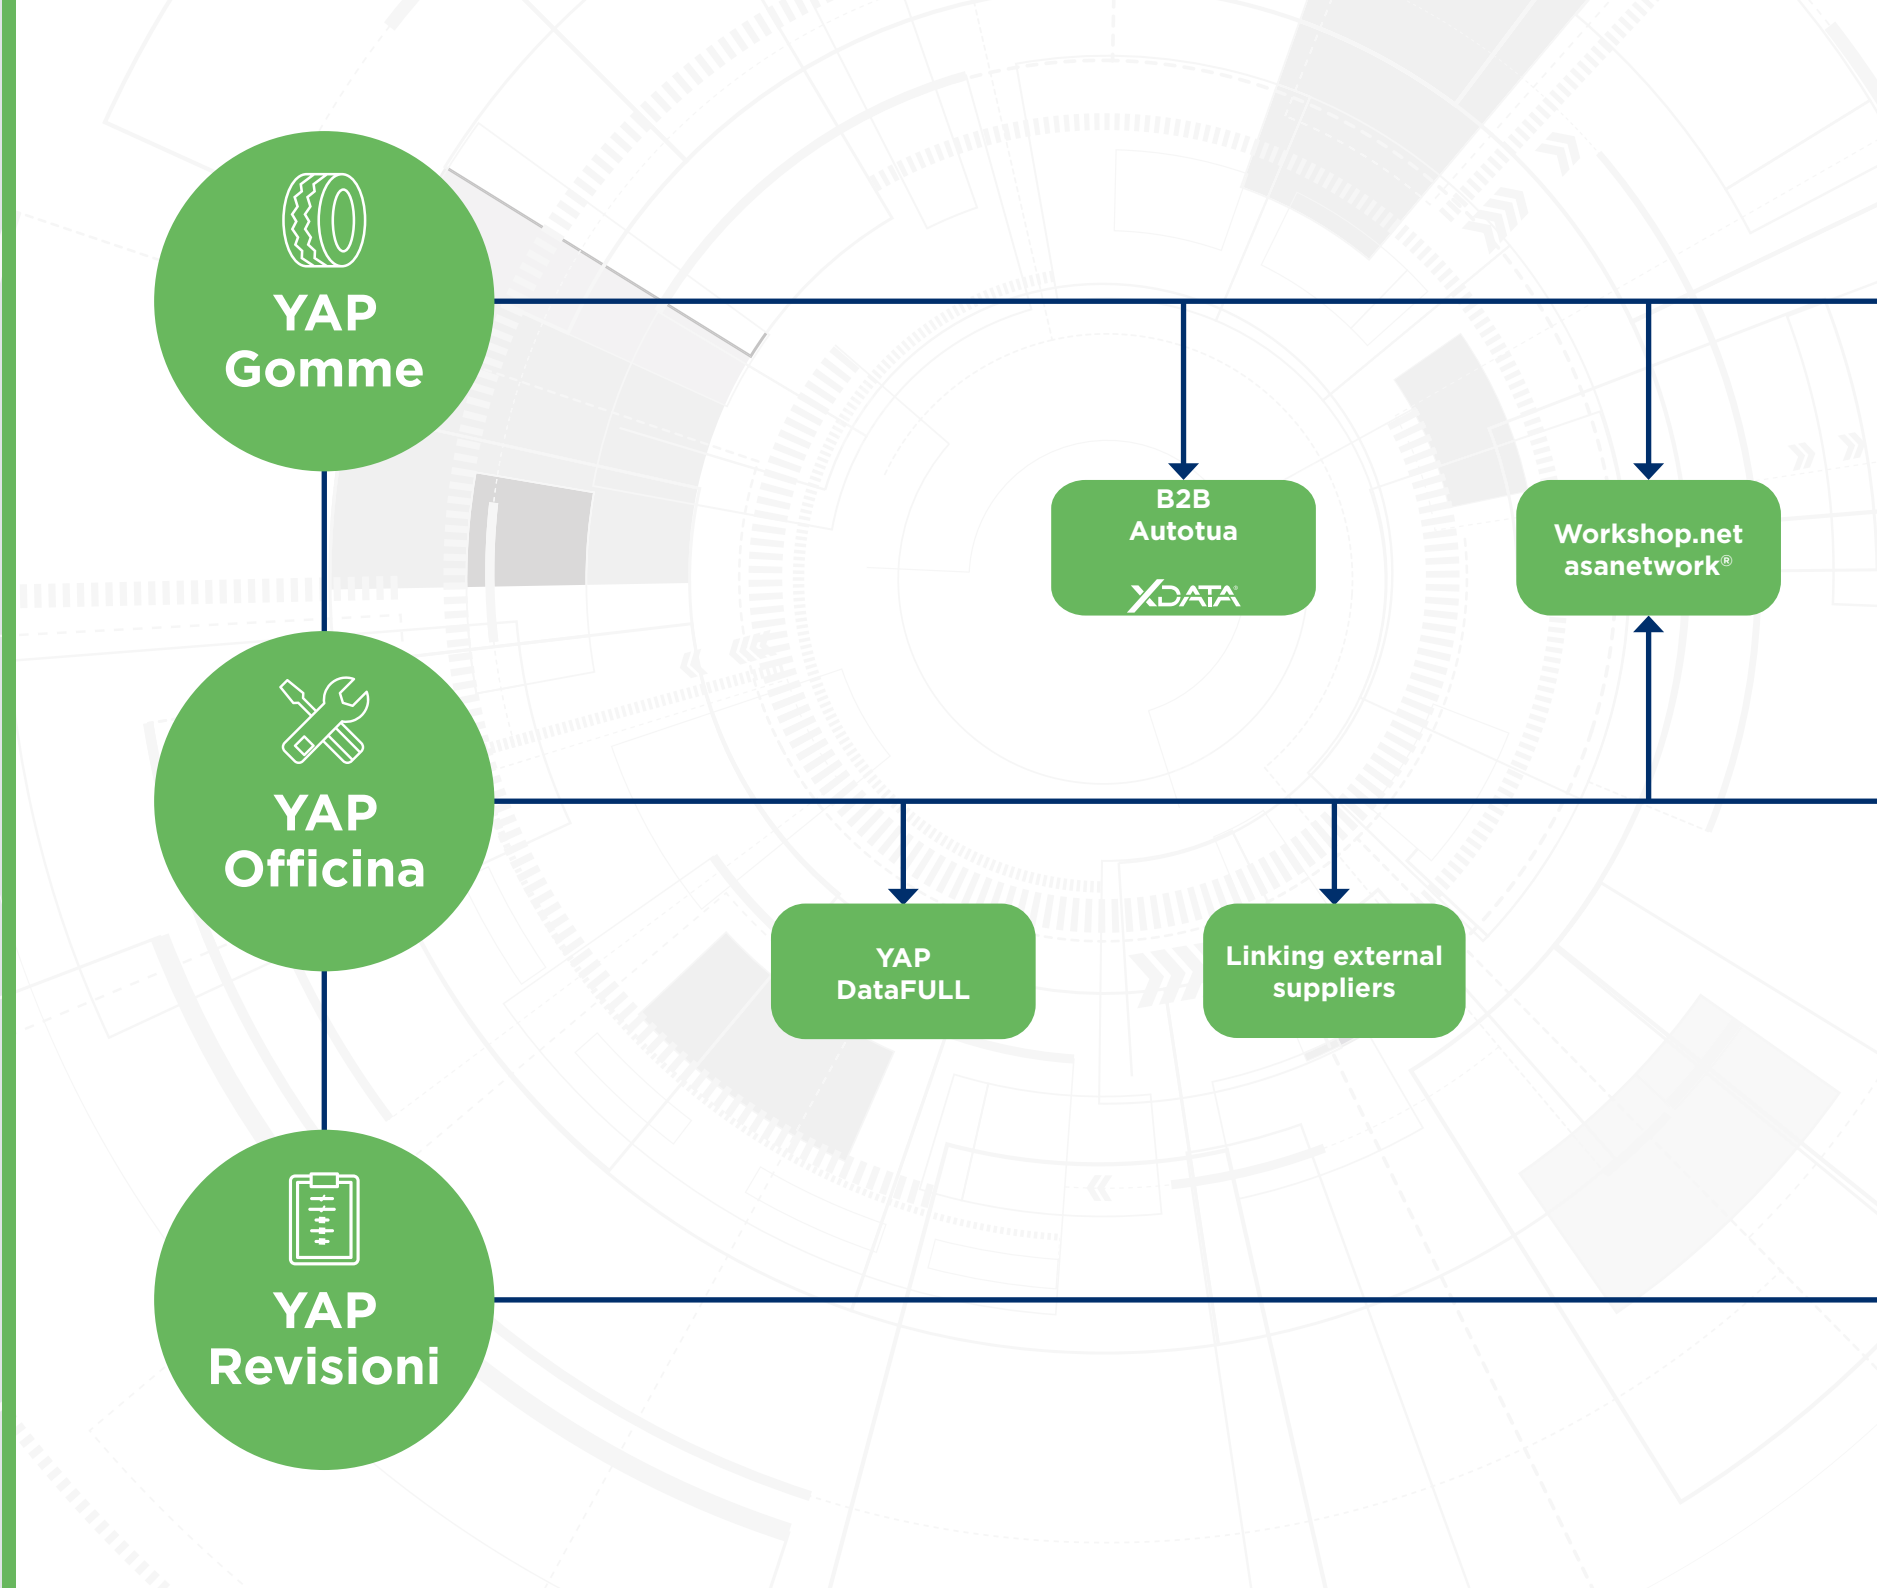

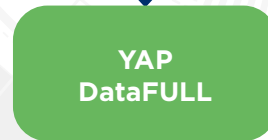

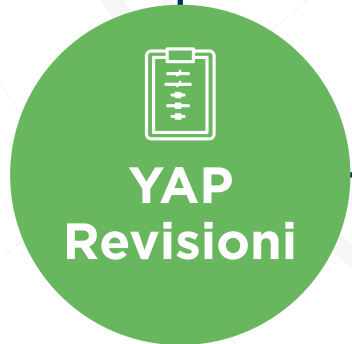

YAP does not have to be installed because it is **cloud-based**. That means you can work simultaneously from multiple locations, reducing downtime. **Data are backed up automatically**, so if a PC is out of action, MMB support can get another one up and running in minutes, configure any connected printers and restore all your data! You can also install our two mobile apps, one for smart check-in and one to stay in touch with your customers.

GENERATE NEW BUSINESS LEADS WITH INTEGRATED MARKETING SERVICES

You can use the information you've collected about customers or their vehicles to **design communication campaigns targeted** at the contacts in your database. This increases the likelihood that a customer will return and encourages the purchase of new services.

- › Option of sending individual or bulk messages
- › Option of staggering message send times with configurable time slots and SMS quantities per batch
- › Return receipt
- › Automatic sending of courtesy text messages
- › Management and statistical analysis of all messages sent
- › Option of entering a short URL for immediate access to the online booking service

YAP Targa

OPTIMISE THE ARCHIVE OF VEHICLES DUE FOR INSPECTION

Archive data alignment

- › By updating the inspection due date

Last month's summary report

- › Monitor and recall vehicles approaching their inspection due date that have not yet been inspected

e>Bill

FULL MANAGEMENT OF ELECTRONIC BILLING

Comprehensive

- › Integrated management of all your billing incomings and outgoings

Simple

- › Effortless management of your electronic billing directly from YAP for an annual fee

Guided

- › Advanced invoice completion thanks to integration with the item database and an explanatory legend for the XML schema fields

e>Ticket

FOR ELECTRONIC RECEIPT MANAGEMENT

Simple

- › Effortless management of your fiscal receipt directly from YAP

Integrated

- › Seamless management of electronic receipt issuance through your fiscal printer

e>Sign

ONE-STOP SOLUTION FOR DIGITALISATION AND SIGNING OF DOCUMENTS MANAGED IN YAP

What can the customer sign?

- › Inspection requests
- › Privacy notices and consents, automatically synchronised in YAP
- › Estimate approval
- › Work order approval
- › Storage document
- › Any other customised form requiring customer approval/signature

e>Sign PRO

WITH E-SIGN PRO YOU ALSO GET THE INSPECTOR'S QUALIFIED ELECTRONIC SIGNATURE FOR INSPECTION REPORTS

Includes e-Sign features and also allows the inspector to sign inspection reports through the MyYAP app.

It also includes compliant long-term storage and consultation for 10 years, plus the option to add multiple qualified signatures.

Enables the inspector to **apply for registration in the Single Register of Inspectors (RUI)**, as defined by Director's Decree (DD) Protocol No 198 of 9 June 2025.

BI Evolution

A FUNDAMENTAL TOOL TO HELP CAR SERVICE ENTREPRENEURS IMPROVE WORKSHOP MANAGEMENT.

Organised into levels to meet all your needs:

- › **Free:** includes general data and trend tables, which provide a concise snapshot of your company's performance in terms of turnover, vehicle inspections, spare parts, tires, labor, and related services.
- › **Basic:** Building on the snapshot provided in the FREE version, this edition adds advanced visuals and FILTERS that allow you to dive deeper into your data. You'll also find dedicated dashboards for specific areas, such as bookings and communications.
- › **Plus:** The PLUS tier is a major step forward: this is where data analysis truly drives value! Monitor your business health through intuitive dashboards that crossreference data to give you actionable insights into margins and customer loyalty. Plus, leverage smart tools like the Tire Restocking Assistant to track sales and optimize your inventory.

LESS PAPER, LESS STRESS AND MORE ORGANISATION

- › Innovation
- › Work optimisation
- › Saves time and money
- › Document organisation
- › Instant document search and retrieval
- › No more paper waste
- › Optimises office space

SMART CHECK-IN from your mobile

- + Unlimited users with customizable profiles
- + Faster vehicle check-ins operations
- + Real-time access to all information

Specific features

- › Consult and sign **documents online**
- › Identify the vehicle and schedule an appointment on the calendar using the **license plate recognition function**
- › Consult **scheduled jobs**
- › Create and edit **work orders** with real-time integration of completed tasks
- › Draft a customisable **job checklist**
- › Draft free texts using our **speech to text function**
- › Option of **attaching several photographs** to each file
- › Use the integrated **electronic time stamp**
- › Enter the **kilometres travelled by the vehicle**
- › **Send the vehicle to the PCStazione** for inspection and pre-inspection
- › Complete and edit **type approval technical data**
- › **Change the vehicle owner**
- › **Enter tyre and storage information**
- › **Record customer preferences** for contact method, type of fiscal document and payment method

CALENDAR

Consult scheduled jobs and add new appointments

RAPID ACCESS

Send the vehicle to the PCStazione and fill in the work order
